

SELEKT™ User Guide:

SELEKT™

The SELEKT formulae are intended for delivery into the rumen, using a SELEKT cattle pump and drenching set.

1. In cases of mild dehydration, use one sachet of Selekt Fresh Cow 500, Selekt Off Feed or Selekt Restore in 20 litres of warm water. If additional fluid therapy is required, use an additional 1-3 sachets of Selekt Restore in 20-60 L of water. Never use two sachets of Selekt Fresh Cow 500 or Selekt Off Feed and never use the two products together. **These products provide a full dose of 108 g of calcium: no additional calcium is required.**
2. To reduce excess acid in the rumen, one sachet of Selekt Antacid should be used in 20 litres of warm water.

	SELEKT Antacid	SELEKT Fresh Cow 500	SELEKT Off Feed	SELEKT Restore
Excess acid in the rumen	✓			
Following Caesarian section		✓		
Rehydration				✓
For an absorbent effect in the gut, with rehydration				✓
Inappetance in early lactation			✓	
Reduction in the risk of ketosis				
Ketosis recuperation				✓ if fluid is required
Following correction of left displacement of the abomasum			✓	✓
Reduction in the risk of milk fever/hypocalcaemia and ketosis		✓
